

## Products & Services

Hampshire Fire Protection is the end to end solution for all of your fire protection needs. Read on to see the many ways we can help you.

### Sprinkler System Design

Hampshire Fire Protection has the demonstrated ability to design, develop, construct and install fire sprinkler systems on time and within the proposed budget. With the technical expertise our design team has to offer, and the use of advanced 3D design programs, our design team can connect with databases containing design specifications leading to a more efficient project. Count on Hampshire Fire Protection for the accurate preparation of fire sprinkler design drawings for permitting. Contact Don Munro at (603) 432-8221 or at [design@hampshirefire.com](mailto:design@hampshirefire.com) for more information.

### BIM Design System

Hampshire Fire Protection Co., Inc. made a substantial investment in the Building Information Modeling (BIM) software to install fire protection piping, which reduces waste and inefficiency in the building design and construction. BIM is a 3D building design methodology defined by the formation of multi-dimensional models that are linked to databases containing design specifications and other documents pertaining to the project. As one of the few sub-contractors in the Northeast who utilize this specific software, Hampshire Fire Protection Co., Inc will see that the design and installation of the fire sprinkler system in each project with run smoothly due to the shared up-to-date project information that BIM provides to all the sub-contractors involved.

### Sprinkler System Installation

Hampshire Fire Protection installs piping that is fabricated in our shop with each piece of pipe labeled for a particular location in the system. Our sprinkler fitters demonstrate great skill and craftsmanship in their work.

### Sprinkler System Service & Maintenance

Hampshire Fire Protection is well prepared to handle various crises with a trained team of technicians available 24/7/365. Under the National Fire Protection Association, testing and maintenance is done of water-based fire protection systems. The NFPA also requires building owners to have their installed sprinklers periodically tested by a recognized test lab. Contact Carey Demers at (603) 432-8221 or at [service@hampshirefire.com](mailto:service@hampshirefire.com) for more information.

### Sprinkler System Inspections

Hampshire Fire Protection offers fire sprinkler system inspections to our customers to ensure that their system is prepared to offer fire safety for the building. Hampshire Fire Protection conducts their inspections under the National Fire Protection Association standard. Installed Sprinklers are periodically tested by a recognized test lab. Services offered will include Fire Pump Testing, Hydrant Flow Testing, Dry System Trip Testing, Pre-Action & Deluge, Foam Generators and Special Hazard Systems. Contact Roger Yeoman at (603) 432-8221 or at [inspections@hampshirefire.com](mailto:inspections@hampshirefire.com) for more information.

### Fire Extinguishers & Suppression Systems

Hampshire Fire Protection is an authorized Amerex distributor. We sell the full line of Amerex fire extinguishers , and the Amerex KP automatic restaurant fire suppression system . We can design and supply a code compliant fire extinguisher plan for your new construction project or your existing space. We follow up with annual inspections, recharging, hydrostatic testing - we make sure your equipment will work when you need it most. Contact Chris Cutter at (603) 432-8221 or at [extinguishers@hampshirefire.com](mailto:extinguishers@hampshirefire.com) This e-mail address is being protected from spam bots, you need JavaScript enabled to view it for more information.

### Alarm Systems

Hampshire Fire Protection offers alarm systems that are essential in safely evacuating facilities and indicating the location of the problem.
